

7.

1. Description:

The college always tries to promote the save energy by using the LED lights, solar system, solar lights and solar Geyser as per requirement in the different places in the college campus and also motivates the teachers , students and non-teaching staff to save energy in the college campus. The institution has the facility of alternative resources to save energy by using the LED bulbs in the classroom, auditorium, office, departments etc. The whole building of the college is well ventilated which also helps to conserve the energy.
