1. Sh. Lal Bahadur Shastri Arya Mahila College, Barnala (Punjab):

Sh. Lal Bahadur Shastri Arya Mahila College, Barnala is the premier institute of the Malwa region of the state of Punjab established in 1968. Sh. Lal Bahadur Shastri Arya Mahila College is a prominent institute which got highest score in the region by NAAC and affiliated to Punjabi University, Patiala. It has carved a niche in the field of education with excellence in academics, cultural, sports and technical activities. Project and hands on training through workshops to make them ready to take up the challenges in this transforming era of technical educator. With the support of up to date up the in this highly qualified faculty, the college is committed to provide quality education. The main focus of the college is providing education as per the need of today's industrial scenario. To impart value based multi disciplinary education to the girls which can enable them to contribute their knowledge in industrial development, technology revolution, and economic growth of the nation with global perspective.

2. Mahatma Gandhi National Council of Rural Education (MGNCRE):

Mahatma Gandhi National Council of Rural Education under the Ministry of Human Resource Development, in Government of India strives to promote resilient rural India through Higher Education interventions. MGNCRE designs, develops and promotes curriculum inputs for higher education programmes offered by Universities and Autonomous Institutions in India. The higher educational streams of focus for MGNCRE include: Rural Studies, Rural Development, Rural Management, Social Work and Education. The curriculum inputs are both theoretical and practical field-related relevant to rural India.

3. Swachhta Action Plan:

Swachhta Action Plan is a milestone initiative in mainstreaming Swachhta elements across all sectors of the Government in an elaborate, accountable, and sustained manner to realize the Swachh Bharat of Prime Minister's vision and Gandhiji's dream. Swachhata Action Plan (SAP) is one of the flagship initiatives of Hon'ble Prime Minister towards making Swachh Bharat everyone's business. This has brought all Ministries and Departments under one umbrella and contributed towards achieving Swachh Bharat by 2019. Swachh Bharat

Abhiyan is the most significant cleanliness campaign by the Government of India to make the country completely clean and hygienic. A clean India would be the best tribute, India could pay to Mahatma Gandhi on his 150 birth anniversary in 2019," said Shri Narendra Modi as he launched the Swachh Bharat Mission on 2nd October 2014. The campaign aims to achieve the vision of a 'Clean India' by 2nd October 2019. By inviting people to participate in the drive, the Swachhta Abhiyan has turned into a National Movement.

4. Different five parameters:

Sh. LBS Arya Mahila College is very much active in Swachhta related activities, the senior most faculties are appointed as coordinators for implementation of Swachhta activities in the college campus. Our College has undertaken some initiatives inside the campus as well as at the community level including its adopted one village every year by NCC unit. The efforts by the college, aimed at accelerating the pace of realization of this mission, include plantation drives, generating awareness about every issue time to time, installation of blue and green dustbins within the campus, cleaning of campus and surroundings by NSS and NCC volunteers and sanitization programmes during COVID-19. Going beyond the brief and taking the mission a step forward, our endeavours to make its campus not just a clean but also a green and hygienic one which proves to be a model for others to emulate. The following five parameters were adopted by our college under Swachhta Abhiyan:

- 4.1 Greenery
- **4.2** Waste Management
- **4.3** Water Management
- 4.4 Energy Conservation
- 4.5 Sanitation and Hygiene

4.1 Greenery: Identifying the plants in the surroundings is vital to understanding what role each plant can play in the overall development and sustainability of mankind on mother earth. Therefore, it becomes important that each of us is aware of the plant wealth in our surroundings. A step in this direction has already been taken by the Department of Botany. Near about 55 plates bearing plant names *i.e.*, Botanical names, families, populations and common names have already been made. Plants in the college campus have also been so labelled to make the students and the staff aware about the flora of the

campus. The college campus has different kind of plants *i.e.*, herbs, shrubs and trees. These are planted by the gardeners, students, teachers and management staff. The traditional trees that are disappearing have also been preserved by the college. Fruit plants are planted for the birds. To beautify the college, it is also planted with the ornamental plants which enhance the look of college. Flowering plants keep the mood of students and teachers happy and create a fragrance in the environment that creates positive energy in the college. A herbal garden has been set up in the college which has many spices and condiments which are useful in Ayurveda. The students are also introduced to these special types of herbs. Following are the some photographs of plants captured from college campus:

Azadirachta indica (Neem)

Eucalyptus (Safeda)

Bauhinia variegate (Kachnar)

Phyllanthus emblica (Amla)

Banyan (Bohar)

Bougainvillea glabra (Paper flower)

Platycladus orientalis (More pankh)

Rosa indica (Rose)

Hibiscus rosa-sinensis (China rose)

Sr. No.	Botanical Name	Family	Common Name	Populations
1.	Azadirachta indica	Meliaceae	Neem	23
2.	Eucalyptus	Myrtaceae	Safeda	09
3.	Hyophrobe lagenicaulis	Arecaceae	Bottle palm	13
4.	Bauhinia variegate	Fabaceae	Kachnar	04
5.	Phyllanthus emblica	Thaceae	Amla	03
6.	Araucaria araucana	Araucariaceae	Monkey puzzle	06
7.	Citrus maxine	Rutaceae	Chakotra	02
8.	Gossypium sp	Malvaceae	Narma	04
9.	Banyan	Moraceae	Bohar	01
10.	Polyalthia longifera	Annonaceae	Ashoka/Buddha tree	155
11.	Citrus sinensis	Rutaceae	Narangi	02
12.	Delonix regia	Fabaceae	Gulmohar	01
13.	Ficus elastica	Moraceae	Rubber plant	02
14.	Cocculus hirsutus	Menispermaceae	Jamni	04
15.	Musa paradisiaca	Musaceae	Kela	06
16.	Ponngania pinnata	Fabaceae	Beech tree	02
17.	Epipremnum aureum	Araceae	Money plant	12
18.	Bougainvillea glabra	Nyctaginaceae	Paper flower	12
19.	Platycladus orientalis	Cuppressaceae	More pankh	25
20.	Rosa indica	Rosaceae	Rose	132
21.	Helianthus	Asteraceae	Sunflower	340
22.	Cascabela theutia	Apocynaceae	kaner	22
23.	Hibiscus rosa-sinensis	Malvaceae	China rose	30
24.	Aegle marmellos	Rutaceae	Belpatra	08
25.	Cactus	Cactaceae	Cactus	09
26.	Psidium guajava	Myrtaceae	Gauva/Amrood	06
27.	Spinacia oleraceae	Amaranthaceae	Palak	212
28.	Aloe barbadensis	Liliaceae	Alovera	05
29.	Draceana marginata	Agavaceae	Dragon	17
30.	Satakentia ciukivensis	Araceae	Satake Palm	13
31.	Alstonia ciukivensis	Apocynaceae	Pulai	11
32.	Cycas revolute	Cycadaceae	Kangi Palm	03
33.	Ocimum tenuiflorum	Zamiaceae	Tulsi	100
34.	Tabernaemontana divertica	Apocynaceae	Chandni	10
35.	Bryophyllum pinnatum	Crassulaceae	Pattharchatt	10
36.	Mangifera indica	Anacardiaceae	Aam/Ambb	05
37.	Catharanthus roseus	Apocynaceae	Sadabahar	90
38.	Pleomale	Ruscaceae	Song of India	05
39.	Vernonia elaegnifolia	Asteraceae	Parda Veil	Numerous

Flora of the Campus

Psidium guajava (Gauva/Amrood)

Aloe barbadensis (Alovera)

Tabernaemontana divertica (Chandni)

Over the past few decades, the population of house sparrow has declined quite drastically due to continuous degradation of the environment. Bird feeders with waste material were installed at various places in the college campus. Natural habitat and food sources are scarce for these creatures, and even by hanging out one or two feeders would be helping many birds survive difficult months. It also engaged students in observing and learning about birds and their behaviour.

The students and staff members have planted several tree species during various tree plantation programmes organized by the College NSS and NCC unit and all these trees are taken care of and maintained by the gardeners of the college. The students of NCC unit of the college participated in the activity and planted the trees in the college premises. They all pledged to plant more and more trees with the time and take care of the plants and to provide with basic needs as and when needed. Nowadays, everywhere we hear the ongoing destruction of our natural resources. The simplest thing that we can do to help is to plant a tree. It is such a simple and basic task, and the truth is that, every tree makes a difference. The plantation program organized by our students under the NCC activity was an initiative to save our planet.

4.2 Waste management: The College has functional vermicomposting unit for organic manure production. This initiative was taken under "Swachh Bharat Abhiyan" where main aim was to recycle green waste generated in college campus into manure that could further be utilized for gardening purpose. Thus, with this initiative, zero waste zones could be created in the college premises.

Vermicomposting unit: Two vermi beds were prepared for the introduction of green waste mixed with cow dung in the proportion of 50:50 in each. *Eisenia foetida*, commonly known as red worm was used for vermicomposting. Seven kilograms of earthworms were inoculated in each bed after 10 days of pre-decomposition. All the beds were covered on the top by a paddy straw to protect the earthworms from the predators and to prevent moisture loss. The process of vermicomposting was carried out for a period of 30-44 days. The temperature and moisture content were maintained by sprinkling adequate quantity of water every day and upside down mixing of waste was done once daily. After the feed material got converted into loose, granular mounds, the entire material was collected from each bed. The cast was passed through the sieve and the earthworms were removed manually. The cast was air dried by spreading on a sheet. After sufficient moisture was lost, the vermicompost was stored in bags for further analysis.

Vermicompost Unit

Bottle garden: The College introduced the Bottle garden by use of discarded plastic bottles, old tyres, oil cans, paint boxes and other waste to grow plants.

Green manure: The College is full of plants, so these are dry up and fall down. These dry leaves and twigs are collected and put in two different pits and sprinkled with water and different kind of eco friendly nitrogen fixing bacteria. After a certain period of time it becomes green manure which can be use for college plants.

Green Manure Pit

Liquid manure: Liquid manure is made in the college campus by putting water, molasses and different type of eco friendly nitrogen fixing bacteria in a tank. This liquid is sprayed in the roots of plants. This mixture produces a variety of nutrients in plants which increases their growth.

Bacterial Culture

Despite of all these aspects dry college waste such as paper trash that is no longer usable, is sold as junk and used as envelop making for students to be used. Wet garbage is collected and sent to the city council shed.

4.3 Water management: Water conservation is the careful use and preservation of water supply and includes both the quantity and quality of water utilized. Water is an essential asset for the nourishment of all life and is the fundamental demand for all activities appropriate from domestic use to agricultural and industry. With the regularly expanding weight of the human population, there has been a serious tension on water resources. A recharge pit allows the rainwater to replenish groundwater by recharging the underground aquifers. It can be built to recharge a bore well or just to help the water infiltration in an area. College has installed 2 rain harvesting pits in the college campus. The common Procedure to construct the pit involves a 5 stage Process:

Stage 1: Digging a pit with required dimensions

Stage 2: Filling the 3/4th of the pit with black stone which does not absorb any water

Stage 3: Constructing Cement Brick wall around the pit Stage

Stage 4: Filling up the remaining 1/4th of the pit with 30mm metal stone Stage

Stage 5: Covering the pit with Iron mesh

Rain Water Harvesting System

Rainwater is collected and transported to the earth through a pipe system. This process raises the level of groundwater that went down. That's why rain water harvesting projects have been set up in the college. Any water content that get wasted

in drinking is sent to different plant beds. The water flowing out of the RO system in the college is also not wasted. Utensils and floors are washed with that water. Water is also conveyed directly to the ground through pipes from the water tanks in the college building. Overflowing water from the tanks in the college campus is also sent directly to the ground through pipes. But only a small amount of this water goes into the ground because all the tanks have installed with water alarms.

4.4 Energy conservation: Energy conservation refers to the methods of reduction in energy consumption by way of elimination of wastage and promotion of efficiency. We know that due to the vast gap between demand and supply, lot of efforts is being done to bridge the gap in terms of generation of more electricity which requires lot of capital investment and apart from it creates lot of environmental concerns. Energy conservation is the key element of energy management. We can reduce the energy consumption by adopting various ways of energy conservation which includes efficient use of technologies and avoiding energy wastages. Number of solar panels is there in the campus which generates huge amount of energy.

Solar System

College class rooms are open and wide which keep the minimum consumption of electricity. Through special camps for college students, teachers and management members, it is learned that electricity should be used properly.

4.5 Sanitation and hygiene: The college campus has RO systems for drinking water. From time to time the drinking water is treated with chlorine. So that students

and teachers get clean and pure water. Due to large size of the College building drinking water has been provided at various places.

Drinking Water

The process of washing hands explained properly to the students from time to time. The college has hand sanitizers in which five to seven students can clean their hands at a time. Students are advised to wash their hands thoroughly before eating and after defecation and urination so as to prevent terrible diseases.

Washing Area

There is a complete provision of toilets for students, teachers and management. There is different type of seats in toilets such as Indian and English style. For students with disabilities special kind of toilets has been made. College campus, hostel, washrooms,

toilets are cleaned with phenyl on daily basis. Sanitary pads are also provided to the girls in the college. To dispose of the napkins dustbins are kept.

Toilets

Despite of all the above mentioned parameters, World Environment Day is celebrated every year on 5th June to raise global awareness to take positive environmental action to protect nature and the planet Earth. On the World Environment Day, 5th June the Environment and Educational Club successfully organized a tree plantation program in a very unique way by using waste plastic bottles called- Reduce, Reuse and Recycle. The students collected the waste bottles and decorated the bottles with colours. On this World Environment Day, 150 trees were planted in the waste bottles and pots in order to make hanging garden in the open terrace. Also the oxygen generated plants were distributed to the local people of city.

5. Future course of action:

- ❖ In future we will go to the different nearby villages to make people aware about environment and plant more trees
- ❖ At the same time we will create another herbal garden with 35 different verities of species and condiments

6. Duration of the project: 6 months
